

INTERNSHIP PRESENTATION

School of Computer Science and Engineering
B.Tech (CSE) 5th Semester(3rd Year)

INTERNSHIP TITLE : Cisco Virtual Internship Program 2026

INTERNSHIP ORGANIZATION : CISCO

PROGRAM PARTNER : AICTE

COURSES COMPLETED:

- **Introduction to Modern AI**
- **Apply AI: Analyze Customer Reviews**
- **Data Analytics Essentials**

STUDENT DETAILS :

NAME - AYAN MANDAL

ROLL NO - 2410030019

CLASS - 3CSE1

BRANCH - B.TECH CSE AIML

● Outlook of Presentation

1. Title
2. About Cisco Networking Academy
3. About the Internship
4. Internship Learning Journey
5. Introduction to Modern AI
6. Modern AI: Techniques & Applications
7. Apply AI: Analyze Customer Reviews
8. Customer Review Analysis Workflow
9. Techniques Used in Customer Review Analysis
10. Data Analytics Essentials
11. Tools & Technologies
12. Data Analytics Workflow
13. Integration of All Three Courses
14. Practical Case Study
15. Skills Learned
16. Challenges & Solutions
17. Key Takeaways
18. Future Scope
19. Conclusion
20. All 3 Courses Certificate
21. Thank You

ABOUT CISCO NETWORKING ACADEMY

- Cisco Networking Academy is a technology education initiative that provides industry-oriented learning and technical training.
- It offers courses in areas such as Artificial Intelligence, Data Analytics, Networking, Cybersecurity, Programming, and emerging technologies.
- The platform combines theoretical concepts with practical learning activities, assessments, and hands-on exercises.
- Cisco Networking Academy helps students develop technical knowledge and industry-relevant skills.
- The courses provide learners with opportunities to explore real-world applications of modern technologies.

Key Focus - Learn → Practice → Apply → Build Skills

My Cisco Learning Journey

Three Courses | One Learning Path

01 — INTRODUCTION TO MODERN AI

Learn the fundamentals of Artificial Intelligence and modern AI technologies.

02 — APPLY AI: ANALYZE CUSTOMER REVIEWS

Apply AI techniques to analyze real-world customer feedback and generate useful insights.

03 — DATA ANALYTICS ESSENTIALS

Learn how to organize, analyze, visualize, and communicate data-driven insights.

Overall Journey

AI Fundamentals → AI Application → Data Analytics → Business Insights

Course 1: Introduction to Modern AI

What is Modern AI?

Artificial Intelligence enables computer systems to perform tasks that normally require human intelligence, such as understanding information, recognizing patterns, generating content, and assisting with decision-making.

Major Topics Covered

- Artificial Intelligence Fundamentals
- Machine Learning
- Generative AI
- Computer Vision
- Machine Translation
- Chatbots
- Prompting Techniques
- Practical Applications of AI

Key Learning

AI can be used as a practical tool to solve real-world problems and improve productivity.

Techniques Learned in Modern AI

Technique	Application
Machine Learning	Learns patterns from data and supports predictions
Generative AI	Generates text, images, and other content
Computer Vision	Enables computers to understand images and videos
Chatbots	Provides conversational interaction with users
Machine Translation	Converts information between different languages
Prompting	Provides effective instructions to AI models

Real-World Applications

- Healthcare
- Education
- Business
- Customer Service
- Automation
- Content Generation
- Data Analysis

Course 2: Apply AI — Analyze Customer Reviews

Problem Statement - Organizations receive thousands of customer reviews through websites, applications, and social media.

Manually analyzing these reviews is:

- Time-consuming
- Difficult to scale
- Difficult to identify overall trends
- Challenging when reviews contain different topics and languages

AI-Based Solution - AI can help analyze customer reviews and identify:

- Topics
- Themes
- Sentiment
- Customer concerns
- Positive feedback
- Common complaints
- Improvement opportunities

Goal - Convert unstructured customer feedback into meaningful business insights.

Customer Review Analysis Workflow

CUSTOMER REVIEWS

DATA PREPARATION

TOPIC IDENTIFICATION

THEME GROUPING

SENTIMENT ANALYSIS

HUMAN VERIFICATION

INSIGHTS & RECOMMENDATIONS

Example Review

"The food was excellent, but the delivery was very slow."

AI Analysis

Food Quality → Positive

Delivery → Negative

Overall Sentiment → Mixed

Recommendation → Improve delivery speed

Techniques Used for Review Analysis

- 1. Data Cleaning** - Remove duplicate, irrelevant, or unnecessary information.
- 2. Topic Identification** - Identify the main subjects discussed in customer reviews.
- 3. Thematic Analysis** - Group related topics into broader themes.
- 4. Sentiment Analysis** - Identify whether feedback is positive, negative, or mixed.
- 5. Translation** - Support analysis of reviews written in different languages.
- 6. Human-in-the-Loop** - Review and verify AI-generated results to improve reliability.
- 7. Recommendations** - Convert analytical results into actionable business suggestions.

Course 3: Data Analytics Essentials

What is Data Analytics?

Data Analytics is the process of collecting, organizing, analyzing, and visualizing data to discover useful information and support better decision-making.

Key Areas

- Data Collection
- Data Cleaning
- Data Organization
- Data Analysis
- Data Visualization
- Dashboards
- Data Storytelling
- Decision Making

Main Tools - Excel / Spreadsheets | SQL | Tableau

Key Learning - Data analytics transforms raw data into meaningful information and actionable insights.

Data Analytics Process

DATA COLLECTION

DATA CLEANING

DATA ORGANIZATION

DATA ANALYSIS

DATA VISUALIZATION

INSIGHTS

DECISION MAKING

Example

Raw Sales Data

Analyze sales by product, customer, and location

Create charts and dashboards

Identify trends and patterns

Make data-driven business decisions

TOOLS & THEIR ROLES

Tool	Role
Excel / Spreadsheets	Organizing, cleaning, calculating, and analyzing data
SQL	Retrieving, filtering, and analyzing data from databases
Tableau	Creating interactive visualizations and dashboards
AI Tools	Assisting with text analysis, classification, and insight generation
GitHub	Managing and sharing project files and building a portfolio

Tools Used in Data Analytics

Core Skills:

**Data Analysis + SQL + Visualization
+ Data Storytelling**

HOW ALL THREE COURSES CONNECT ?

From AI to Data-Driven Insights

INTRODUCTION TO MODERN AI

Learn AI Concepts

AI • ML • Generative AI • Computer Vision • Chatbots

APPLY AI: ANALYZE CUSTOMER REVIEWS

Apply AI to Real-World Data

Topics • Themes • Sentiment • Recommendations

FINAL OUTCOME -

BUSINESS INSIGHTS & BETTER DECISION-MAKING

DATA ANALYTICS ESSENTIALS

Analyze & Visualize Data

Excel • SQL • Tableau • Dashboards

MINI CASE STUDY

Step 1 — Collect Reviews

Gather customer feedback from different sources.

Step 2 — Apply AI

Classify reviews by topics and sentiment.

Step 3 - Identify Themes

- Food Quality
- Customer Service
- Delivery
- Price
- Cleanliness

Step 5 — Business Decision

Improve delivery operations because delivery receives the highest negative feedback.

Step 4 — Analyze Results

Category	Result
Food Quality	Positive
Customer Service	Mixed
Delivery	Negative
Price	Positive
Cleanliness	Positive

SKILLS & LEARNING OUTCOMES

AI Skills

- Artificial Intelligence Fundamentals
- Machine Learning Concepts
- Generative AI
- Prompting
- Chatbots
- Computer Vision

AI Application Skills

- Customer Review Analysis
- Thematic Analysis
- Sentiment Analysis
- AI-Assisted Classification
- Human Verification

Data Analytics Skills

- Excel / Spreadsheets
- SQL
- Tableau
- Data Visualization
- Dashboards
- Data Storytelling

Professional Skills

- Analytical Thinking
- Problem Solving
- Communication
- Critical Thinking
- Data-Driven Decision Making

CHALLENGES & SOLUTIONS

Challenge	Solution
Understanding modern AI concepts	Studied course modules and practiced AI concepts
Working with unstructured customer reviews	Used AI-assisted classification and thematic analysis
Identifying customer sentiment	Applied sentiment analysis techniques
Organizing large amounts of data	Used spreadsheets and structured data analysis
Understanding SQL queries	Practiced database querying and filtering
Presenting analytical results	Used charts, visualizations, and dashboards
Verifying AI-generated results	Applied human-in-the-loop validation

KEY TAKEAWAYS

What I Learned

- Developed a strong foundation in modern Artificial Intelligence.
- Understood Machine Learning and Generative AI concepts.
- Learned how prompting can improve interaction with AI tools.
- Learned how AI can analyze customer reviews and identify useful patterns.
- Understood thematic and sentiment analysis.
- Learned the fundamentals of data analytics.
- Gained knowledge of Excel, SQL, and Tableau.
- Understood the importance of data visualization and storytelling.
- Learned how data can support business decisions.
- Understood the connection between **AI, Data Analytics, and real-world applications.**

FUTURE SCOPE

Future Applications

The knowledge gained from these courses can be extended to:

AI

- Generative AI Applications
- AI Chatbots
- Computer Vision
- Recommendation Systems

Data Analytics

- Predictive Analytics
- Business Intelligence , Customer Analytics , Automated Dashboards

Combined AI + Analytics

- AI-Powered Business Intelligence
- Customer Sentiment Monitoring
- Automated Review Analysis
- Intelligent Recommendation Systems
- Predictive Customer Behavior Analysis

Career Areas - Data Analyst | AI/ML Engineer | Business Intelligence Analyst | Data Scientist

CONCLUSION

The three Cisco courses provided a progressive learning experience in **AI and Data Analytics**.

Introduction to Modern AI established the fundamentals of modern AI technologies.

Apply AI: Analyze Customer Reviews demonstrated how AI can be applied to real-world text data.

Data Analytics Essentials provided knowledge of data analysis, SQL, visualization, and dashboards.

Together, these courses helped develop the ability to move from **raw data** → **AI analysis** → **visualization** → **actionable insights**.

The learning experience provides a strong foundation for further studies and projects in **AI/ML and Data Analytics**.

Course 1 : Introduction to Modern AI Certificate

Cisco
Networking
Academy

This certificate is awarded to

Ayan Mandal

for successfully completing

Introduction to Modern AI

offered by IILM University
through the Cisco Networking Academy program.

Swati Vashisht
Instructor
IILM University

30 May 2026
Completion Date

Course 2 : Apply AI: Analyze Customer Review

Cisco
Networking
Academy

This certificate is awarded to

Ayan Mandal

for successfully completing

Apply AI: Analyze Customer Reviews

offered by IILM University
through the Cisco Networking Academy program.

Swati Vashisht
Instructor
IILM University

30 May 2026
Completion Date

Course 3 : Data Analytics Essentials

Cisco
Networking
Academy

This certificate is awarded to

Ayan Mandal

for successfully completing

Data Analytics Essentials

offered by IILM University
through the Cisco Networking Academy program.

Swati Vashisht
Instructor
IILM University

11 Jun 2026
Completion Date

Thank
You
